

## **Safety Practices for reopening of Laurie McDonald Nutrition (LMN) May 2020**

These safety practices were created using guidance from the CDC, Department of Labor, Occupational Safety and Health Administration (OSHA) and ADHS to limit and mitigate the spread of COVID-19.

- Disinfection will be done using an EPA- approved disinfectant against COVID-19
- Appointments will be spaced sufficiently apart to allow time for disinfecting between clients
- No more than 3 persons will be allowed in the LMN office at one time
- Practitioner will wear a face mask
- Clients will be asked to wear a face mask (one will be provided)
- Will create as much physical space as possible between practitioner and client
- No handshaking will be done in greeting
- Practitioner will take daily temperature readings
- Clients will be asked to reschedule, or ask for a telehealth appointment if not feeling well
- Will use electronic means as much as possible to relay information, vs. with paper and pen

**“Stay Healthy, Return Smarter, Return Stronger”**
